LETTER TO THE EDITOR

NAORA, H., DEACON, N. J. and BRAITHWAITE, A. W., Territorial Confrontation Among Genes and Activation of a Cellular Oncogene . . . . . 715

# Index to Volume 105

Adaptive variation in the timing of life history stages; seasonal incidence, 147
Adhesion, granulocyte, possible relationships and interactions among events in clotting, platelet adhesion, immune surface reactions and (letter), 541
Ageing, differentiation and terminal differentiation: a semantic analysis, 545
Alarmone, specific, is it synthesized by stalled replication forks?, 707
Altruism, the evolution of (letter), 371
Anemotropic response, mass transfer from *Phycomyces* in the avoidance and; numerical modeling, 77
Animals, different, two, may not have the same environment (letter), 369
Animals, when do they learn the evolutionarily stable strategy? (letter), 181
Ants, probabilitistic behaviour of; a strategy of errors?, 259
Apoptosis, cellular death by, in some radiosensitive and radioresistant mammalian tissues, 391
Appendages, suspension-feeding, the morphology and performance of, 1
Asexual reproduction coupled with heterothallism; possible consequences for fungi (letter), 373
AT- and GC-rich bacteria, the consequences of base-pair substitution mutations in, 117
Avoidance and anemotropic responses, mass transfer from *Phycomyces* in; numerical modeling, 77
Axial rotation, influence on interception of solar radiation by plant leaves, 603

Bacteria, AT- and GC-rich, the consequences of base-pair substitution mutations in, 117
BÂNDEA, C. I., A new theory on the origin and the nature of viruses, 591
BARRAI, I., A model for differentiation, 379
Base-pair substitution mutations in AT- and GC-rich bacteria, the consequences of, 117
Binding, poly(ADP-ribose), to DNA, a neighbour-exclusion intercalating model for, 461
Binding site and drug interaction with calmodulin, 63
Binding, virus, a kinetic model which involves release of cell-bound virus-receptor complexes, 631
Biological application of the statistical concepts used in the Second Law, 103
Biomodality in neuronal interspike interval distributions, a theoretical basis for large coefficient of variation and, 345
Blood sucking in insects, feeding strategy and the mechanics of, 661
BLUMENTHAL, R. (see KATZ, Y.), 493
BORISOV, A. Y. (see KUDŽMAUSKAS, Š.), 13
BRAITHWAITE, A. W. (see NAORA, H.), 715
BYWATER, R. P. and FINNEY, J. L., Particle geometry and the chromatographic separation of cells: the simplest case of uniform particles, 333

Cactus bodies and plant leaves, on the relationship between interception of direct solar radiation by, 619
Calmodulin, the binding site for drug interaction with, 63
Carcinogenic risk assessments, a unifying concept for, 35
CARPENTER, S. R., Lake geometry: implications for production and sediment accretion rates, 273
Catalase, a proposed mechanism for the catalatic action of, 553
Cell size and the concept of wasteful and frugal evolutionary strategies, 201
Cell-bound virus-receptor complexes, a kinetic model for virus binding which involves release of, 631
Cells, particle geometry and the chromatographic separation of; the simplest case of uniform particles, 333
Cellular death by apoptosis in some radiosensitive and radioresistant mammalian tissues, 391
Cellular oncogene, territorial confrontation among genes and activation of a (letter), 715
CHALUP, M. S. (see LAWS, E. A.), 469
Chamber dynamics, dependence on chamber dimensions, 679
CHANG, H. N. (see GHIM, Y. S.), 91
CHAPMAN, B. E. (see KUCHEL, P. W.), 569
Chromatographic separation of cells, particle geometry and; the simplest case of uniform particles, 333
CLARKE, C. H., The consequences of base-pair substitution mutations in AT- and GC-rich bacteria, 117
Clinical variable risk prognostic compartmental model, 511
Clotting, platelet adhesion, immune surface reactions and granulocyte adhesion, possible relationships and interactions among events in (letter), 541
COURTNEY, S. P. (see PARKER, G. A.), 147

DALL, D. J., A theory for the mechanism of polar filament extrusion in the microspora, 647
DAMJANOVICH, A., SOMOGYI, B. and WELCH, R. G., Protein fluctuation and enzyme activity, 25
DANIEL, T. L. and KINGSOLVER, J. G., Feeding strategy and the mechanics of blood sucking in insects, 661
DEACON, N. J. (see NAORA, H.), 715
Death, cellular, by apoptosis in some radiosensitive and radioresistant mammalian tissues, 391
Denaturation of some general DNA sequences, 245
DENEUBOURG, J. L., PASTEELS, J. M. and VERHAEGHE, J. C., Probabilistic behaviour in ants: a strategy of errors?, 259
Differentiation, a model for, 379
Differentiation, ageing and terminal differentiation: a semantic analysis, 545
Diffusion, single file, continuum vs discrete models in; rate theory models for ion transport through rigid pores, 287
Diffusional falsification of kinetic constants on Lineweaver–Burk plots, 91
DNA, a neighbour-exclusion intercalating model for poly(ADP-ribose) binding to, 461
DNA sequences, general, denaturation of, 245

DNAs, double-stranded, correlation between thermal stability maps and genetic maps of, 133
DOUNCE, A. L., A proposed mechanism for the catalatic action of catalase, 553
Drug interaction with calmodulin: the binding site, 63
Dynamics, chamber, dependence on chamber dimensions, 679

EDELSTEIN, L. and HADAR, Y., A model for pellet size distributions in submerged mycelial cultures, 427
ELASSER, W. M., Biological application of the statistical concepts used in the Second Law, 103
ELDER, D., The evolution of altruism (letter), 371
Electrophysiological bases for linear and for nonlinear product term lateral inhibition and the consequences for wide field textured stimuli, 233
Environment may not be the same for two different animals (letter), 369
Enzyme activity, protein fluctuation and, 25
Enzyme systems, NMR spin exchange kinetics at equilibrium in membrane transport and, 569
Error strategy, and probabilistic behaviour in ants, 259
Evolution of altruism (letter), 371
Evolution of brain size in neonatal and adult placental mammals: a theoretical approach, 317
Evolution of methionine transfer ribonucleic acids, human mitochondrial genome and, 221
Evolutionarily stable sex ratios and sex allocations, 525
Evolutionarily stable strategy learning, comments on (letter), 177
Evolutionarily stable strategy, when do animals learn it? (letter), 181
Evolutionary changes in the information content of polypeptides, 185
Evolutionary strategies, wasteful and frugal, cell size and the concept of, 201
Excitation transfer in photosynthetic units, a theory of, 13

Fecundability estimation, sterility and, 211
Feeding strategy and the mechanics of blood sucking in insects, 661
Filament, polar, extrusion, in the microspora, a theory for the mechanism of, 647
FINNEY, J. L. (see BYWATER, R. P.), 333
FREHLAND, E. (see STEPHAN, W.), 287
Frugal and wasteful evolutionary strategies, cell size and the concept of, 201
Fungi, possible consequences of asexual reproduction coupled with heterothallism (letter), 373

GAMOW, R. I. (see PELLEGRINO, J. J.), 77
GC- and AT-rich bacteria, the consequences of base-pair substitution mutations in, 117
Genes, territorial confrontation among, and activation of a cellular oncogene (letter), 715
Genetic code, stereochemical origins of, 159
Genetic maps and thermal stability maps of double-stranded DNAs, correlation between, 133
Genome, mitochondrial, human, and the evolution of methionine transfer ribonucleic acids, 221

GHIM, Y. S. and CHANG, H. N., Diffusional falsification of kinetic constants on Lineweaver–Burk plots, 91
Glucagon, a model for the three-dimensional structure of, 403
GRAFSTEIN, D., Stereochemical origins of the genetic code, 159
Granulocyte adhesion, possible relationships and interactions among events in clotting, platelet adhesion, immune surface reactions and (letter), 541
GRIFFIN, G. D. (see JONES, T. D.), 35
Growth of phytoplankton, a theoretical and experimental examination of the predictions of two recent models of, 469

HADAR, Y. (see EDELSTEIN, L.), 427
HARLEY, C. B., When do animals learn the evolutionarily stable strategy? (letter), 181
HERBERT, T. J., On the relationship between interception of direct solar radiation by cactus bodies and plant leaves, 619
HERBERT, T. J., The influence of axial rotation upon interception of solar radiation by plant leaves, 603
Heterothallism, asexual reproduction coupled with; possible consequences for fungi (letter), 373
HOFFMAN, M. E. (see KATZ, Y.), 493
HOFMAN, M. A., Evolution of brain size in neonatal and adult placental mammals: a theoretical approach, 317
HOUSTON, A., Comments on "Learning the evolutionarily stable strategy" (letter), 177
Human mitochondrial genome and the evolution of methionine transfer ribonucleic acids, 221
Human walking, why the upper limbs move during, 311

Immune surface reactions, granulocyte adhesion, platelet adhesion and clotting, possible relationships and interactions among events in (letter), 541
INCARDONA, N. L., A kinetic model for virus binding which involves release of cell-bound virus-receptor complexes, 631
Information content of polypeptides, evolutionary changes in, 185
Insects, feeding strategy and the mechanics of blood sucking in, 661
Intercalating model, neighbour-exclusion, for poly(ADP-ribose) binding to DNA, 461
Ion transport through rigid pores, rate theory models for; continuum vs discrete models in single file diffusion, 287

JACKSON, K. M., Why the upper limbs move during human walking, 311
JONES, T. D., GRIFFIN, G. D. and WALSH, P. J., A unifying concept for carcinogenic risk assessments, 35

KARL, D. M. (see LAWS, E. A.), 469
KATZ, Y., HOFFMAN, M. E. and BLUMENTHAL, R., Parametric analysis of membrane characteristics and membrane structure, 493
Kinetic constants, diffusional falsification on Lineweaver–Burk plots, 91
Kinetic model for virus binding which involves release of cell-bound virus-receptor complexes, 631

Kinetics, NMR spin exchange, at equilibrium in membrane transport and enzyme systems, 569
KINGSOLVER, J. G. (see DANIEL, T. L.), 661
KLEUTSCH, B. (see STEPHAN, W.), 287
